Assistive Technology

There are a variety of assistive technologies available for blind and visually impaired people, but a few are accessible in a suitable format.

- Braille Method
- Screen Readers
- Screen Magnifiers
- Electronic Travel Aids

Screen Magnifier

Basic English Braille

Technology Issues

Web accessibility is a major issue when navigating the internet. The most frequent accessibility issues are:

- Conceptual Problems
 - Simplicity
 - Labeling Fields
 - Rapid Access
 - Navigation Links
- Technical problems
 - Links Formulation
- Availability
- Affordability
- Appropriateness

User Interface for Simple Search

Blind and Visually Impaired People Can Play Games

They are now able to join the video gaming fun as a result of the ever expanding range of audio games. Games allow users to:

- Build Social Skills
- Develop Educational Skills
- Provide Entertainment

TITLE	CATEGORY
Armadillo Army	Entertainment

Teacher's Pet	Educational
Grizzly Gulch	Entertainment
Ghilingham	Entertainment

Games for Blind and Visually Impaired People

Video and Audio Games

Suggested Solutions

- Set up an information campaign to inform the opinion to the technology device makers, the webmasters, and the policy makers about the accessibility issues encountered by blind and visually impaired people.
- Encourage the use of the Web Content Accessibility Guidelines (WCAG).
- Use web content accessibility validation programs to test websites accessibility.
 - Wave 3.0
 - A-Prompt
 - HiSoftware

Web Accessibility for Everyone
